EXECUTIVE PROFILE

Highly accomplished IT Executive and Cloud Solution Architect with over 30 years of experience driving digital transformation, modernizing enterprise architectures, and leading multi-zonal engineering teams across major financial advisory, energy, and commercial sectors. A trusted strategic advisor expert at navigating high-stakes corporate initiatives, establishing robust organizational technical guardrails, and delivering highly secure, scalable, event-driven cloud platforms that bridge the gap between complex technical engineering and director-level business metrics. Formerly a **Specialist Leader at Deloitte**, where I spearheaded a diverse portfolio of complex accounts and directed large-scale strategic initiatives

KEY LEADERSHIP METRICS & BUSINESS IMPACT

The following metrics are excerpts out of the multitude of projects delivered to show case objective realized, typical financial responsibility and speed of execution. These are not necessarily same engagements

+116% Python Adoption Growth Scaled specialized developer team from 300 to over 650 professionals in 12 months.	\$8.0M Digital Program Delivery Led 4 multi-shore teams (50 members) prioritizing critical client experience initiatives.	3.5 Mo. Rapid MVP Rollout Architected and delivered a multi-system enterprise commodity integration and value chain optimization using SAFe.
--	--	---

CORE COMPETENCIES & EXPERTISE

- Enterprise Architecture & Governance:** Setting corporate technology standards, infrastructure processes, and security guardrails for cross-departmental platforms.
- Multi-Zonal Team Leadership:** Directing large-scale (50+ members) onshore/offshore teams, coordinating multi-disciplinary workstreams using Agile/SAFe frameworks.
- Cloud Integration & Scalability:** Designing secure transactional repositories and analytical storage setups with cutting-edge, event-driven architectures.

- **Data Science & Advanced Analytics Ready:** Pivoting legacy environments into high-performance infrastructure optimized for big data engines and AI pipelines.

STRATEGIC LEADERSHIP & SYSTEM INTEGRATION RECORD

Practice Lead | Major Financial Advisory Enterprise

- Led the technical language office for Python, single-handedly transforming the development culture and accelerating specialized professional adoption from **300 to 650+ users within 12 months**.
- Formulated enterprise-grade **security guardrails, standard processes, and infrastructure baselines** required to support advanced data science, analytics engines, and modern AI platform integration (including LLMs, RAG pipelines, and agentic tool execution) across multiple business units.

Technical Delivery Lead | Global Energy & Resources Network

- Architected and synchronized a complex, data-heavy network asset platform using **Scaled Agile Framework (SAFe)** to orchestrate a cross-team effort delivering a highly anticipated MVP in just **3.5 months**.
- Pioneered an cutting-edge transactional-to-analytical integration pattern, combining **Cosmos DB (transactional repository), Azure Data Lake (long-term data warehouse), and Databricks** as the foundational network optimization engine for complex commodity forecasting pipelines.

Program Director & Portfolio Lead | Large-Scale Enterprise Initiative

- Accountable for a major digital experience transformation program valued at **\$8.0 million over a 2-year lifecycle**, overseeing 4 critical onshore/offshore teams encompassing 50+ total engineering and design professionals.
- Successfully streamlined highly integrated user flows including multi-channel pre-visit notifications, scheduling systems, online questionnaires, and geographical routing features to maximize customer retention and operational fluidity.

TECHNICAL SIGNATURE & TOOLKIT

Microsoft Azure Stack:	Microsoft Azure (PaaS, IaaS), Azure Kubernetes Service (AKS), Cosmos DB, Azure Data Factory, Azure Data Lake, Logic Apps, Azure Databricks, Azure Service Bus, Azure Websites, Azure Functions, Azure Queue, Azure Pipelines.
Amazon Web Services Stack:	AWS DocumentDB, AWS Lambda, AWS API Gateway, AWS S3, AWS CodeBuild, Amazon Web Services Cloud Services.
Development Tools & Frameworks:	Visual Studio Enterprise, Visual Studio Code, SQL Server Management Studio, TFS / Azure DevOps, Sitecore XP (8/8.1), Octopus Deploy, Git, Adobe Experience Manager, Jenkins, Docker, Kubernetes, Biztalk Server, Mule ESB, Microsoft Dynamics CRM, Microsoft .NET Framework.
Languages & Formats:	C#, Python, ASP.NET MVC, ASP.NET Web API, .NET Framework, WinForms, NodeJS, JavaScript, jQuery, Angular, Bootstrap, Transact-SQL, HTML, CSS, XML, JSON.
Core Capabilities & OS:	Program Management, Agile (SAFe), Delivery, Solution Design, SDLC Process Design, DevSecOps, Account Delivery Management, SQL Server, MongoDB, Windows, Mac, Linux (Ubuntu, RHET).
